Specifications

- **Package Dimensions:** 4.37 x 4.33 x 4.13 inches
- **Batteries:** 1 CR2 batteries
- **Material Type:** Plastic
- **Output Wattage:** 3 Watts
- **Battery type:** Lithium Metal
- **Power Source:** Corded Electric
- **Wattage:** 3 watts
- **Brand:** COIDEA

Introduction

The COIDEA Disco Ball Disco Lights Party Lights are a particular kind of strobe light that responds to sound. Considering that the lights will flash in rhythm with the music or other sounds in the room, they can be employed to create a disco or party ambiance. Since they are frequently compact and transportable, they are simple to put up and utilise in a number of settings. Some variants could come with extra features like remote control and a programmable flash speed.

What's In the Box?

The contents of the box for the Disco Ball Disco Lights-COIDEA Party Lights Sound Activated Strobe Light may vary depending on the specific product, but generally, it should include the following items:

1. The disco ball light itself is the main component of the product.
2. A power cord or adapter for connecting the light to a power source.
3. A remote control or control button to adjust the settings of the light.
4. An instruction manual or guide on how to set up and use the light.
5. Screws or other hardware for mounting the light if necessary.

It is best to check the product packaging or the manufacturer's website for a detailed list of what is included in the box.

Wildly Used Party Lamp

It is appropriate for all settings, including those at home, in a room, a bar, a pool, a school, and parties for children's birthdays, weddings, Halloween celebrations, and Christmas. At events like parties, dances, and other gatherings, a variety of party lamps are frequently utilized to create a celebratory mood. These traditional party lights create the appearance of a dance floor by projecting a pattern of moving spots on the walls and ceiling.

SAVING ENERGY

Due to the use of LED technology, the 3W Magic Light has a long operating life of more than 10,000 hours. The lighting device has been improved with more dependable and long-lasting electronic components, a glass outer casing, and lights that will offer the greatest lighting experience.

7 distinct Colours and patterns

- With the remote, you can choose a different hue.
- Generate stunning, vibrant lighting effects
- Make your celebrations even better.

Disco Ball Disco Lights Conclusion

To sum up, Disco Ball Disco lights are a traditional and well-liked option for establishing a joyful and energetic ambiance at events and celebrations. They are renowned for their ability to create the appearance of a dance floor by projecting a pattern of moving spots onto the walls and ceiling. Since they are frequently compact and transportable, they are simple to put up and utilise in a number of settings. Some variants could come with extra features like remote control and a programmable flash speed. They can be used both independently and in conjunction with other party lights to produce a more dynamic and spectacular impact. Before choosing a disco ball disco light, it's crucial to take the venue and size of the event into account. You should also observe the safety precautions.

Frequently Asked Questions

How do I get the disco ball light to work?

To get the disco ball light to work, ensure that it is connected to a power source. The light will not function without a power source. Some variants may have an on/off switch, but most will have a power button that needs to be pressed for the light to be turned on.

How do I adjust the settings of the disco ball light?

There are various settings that can be adjusted for the disco ball light. The remote control or control button should be used to adjust these settings. The instructions in the manual should provide details on how to adjust these settings.

How do I mount the disco ball light?

If you want to mount your disco ball light, ensure that it comes with mounting hardware. Otherwise, you can use screws or other methods for mounting it on a surface.

What are some of the features of this disco ball light?

Some of the features of this disco ball light include sound activation and strobe lights that flash in rhythm with music or other sounds in the room.

How many watts does this disco ball light have?

This disco ball light has 3 watts of power output.

How will this light function at an outdoor gathering?

It will function flawlessly as long as it is sufficiently dark and has something to project the lights onto. I would assume that you would prefer it to be suspended so the lights will shine down. The only way to see the lights if they are looking up is to have some form of the outdoor pavilion with a roof.

Does it require a disco ball to function?

No. You only need to plug it in to have your very own “disco ball.”

Is it possible to stop it from spinning?

Yes, and if you'd like, it can also blink. There is a remote control with several settings.

Does the remote have a battery?

A battery is included and ready to use.

Can the lights be set to move constantly for three minutes without any music?

Yes. There are (I believe) 6 different settings, and each one is functional whether or not there is music playing. On the other hand, if there is any music playing, the flashing will match it. The ball will keep flashing until you turn it off, so it might last longer than three minutes straight.

If I turn off the music if there is no sound, does the light still function? I only need the lights; no music or voice activation is necessary.

Yes, both with and without background noise, the light and all of its settings will function.

Can it remain a single colour?

Yes. You can choose Red, Green, or Blue as the colour with the remote.
